**Reports for the very initial step of our first project :**   **Date: 26-04-2012**

 After Mr. Christoph finished his lecture we all had a meeting and we start our work by dividing the project into subtasks and assign our team members which are nine persons to special tasks, so everyone in the team knows her/his role and finally we got the result as below:

Actually we all will work together and help each other ,but in case the tasks are not finished on deadline then the specified persons are responsible to that.

Also the configuration , modeling and documentation teams have started their works today and we are going to have a meeting on Monday to see the progress of our tasks.

As far as I know the repository is made and the configuration steps are as below:

Repository Name: SEPA_GroupB

Global setup:

Set up git
```
  git config --global user.name "Your Name"
  git config --global user.email wazir_ahmadzai@mailbox.tu-berlin.de
```

Next steps:

```
  mkdir SEPA_GroupB
  cd SEPA_GroupB
  git init
  touch README
  git add README
  git commit -m 'first commit'
  git remote add origin git@github.com:ahmadzai/SEPA_GroupB.git
  git push -u origin master
```
